

Data analysis and interpretation : a handbook for postgraduate social scientists

Synopsis:

This book is designed to assist postgraduate social science students and researchers to complete their thesis, dissertation or research projects. This book is equipped with a CD-ROM containing data from a Ph.D thesis. The data will be used from start till end, so that the reader could see the continuous application of various statistical tools and techniques to address the research questions identified. Emphasis is given to various SPSS procedures and selected qualitative techniques. Methods for conducting validity and reliability tests as well as subsequent descriptive and inferential analyses are presented in a logical manner. Finally, methods for interpreting and discussing the research findings are presented accordingly.

Data analysis and interpretation : a handbook for postgraduate social scientists

Table Of Content:

Preface

List of Abbreviations

CHAPTER 1 INTRODUCTION: A BRIEF OVERVIEW OF THE TOPIC

Research Objectives and Questions

The Research Strategy

Conceptual Model

Research Hypotheses and Propositions

Methods

Exploratory Factor Analysis

Measure of Sampling Adequacy

Using Rotated Factor Matrix to Group the Variables

Reliability Analysis

Correlation Analysis

Nonparametric Tests

Qualitative Analysis

CHAPTER 2 FINDINGS

RQ1: How Do Clerical Workers Acquire IT Competence in a Malaysian University?

Types of Formal IT Training Attended by Clerical Workers

Formal Training Methods Undertaken to Acquire IT Competence

The Most Effective Formal Training Methods

IT Competencies Acquired Based on Informal Training Methods

Informal Training Methods Undergone to Acquire IT Competence

The Most Effective Informal Training Methods

RQ2: What is the Current Level of IT Competence of the Malaysian University Clerical Workers?

RQ3: What are the Conditions for Effective Training in Order to Enhance IT Competencies among Malaysian University Clerical Workers and How are the Conditions Ranked?

RQ4: What is the Relationship between Conditions for Effective Training and IT Competence, and are Conditions for Effective Training Based on the Background of Clerical Workers?

Correlational Analysis

Difference of Mean Analysis

The Mann Whitney U Test

The Kruskal Wallis Test

RQ5: How Do the Conditions for Training Effectiveness Affect IT Competence of Clerical Workers of a Malaysian University?

Qualitative Analysis

Attributes of Competent Trainer that Determine Effectiveness in Acquiring IT Competence

Attributes of Trainee Characteristics that Determine Effectiveness in Acquiring IT Competence

Attributes of Organisational System that Determine Effectiveness in Acquiring IT Competence

Attributes of Organisational Management that Determine Effectiveness in Acquiring IT Competence

Attributes of Training Delivery and Methodology that Determine Effectiveness in Acquiring IT Competence

Attributes of IT Facilities that Determine Effectiveness in Acquiring IT Competence

Attributes for Work Culture that Determine Effectiveness in Acquiring IT Competence

Quantitative Analysis

CHAPTER 3 DISCUSSION, IMPLICATIONS, AND FINAL REMARKS

Discussion

How do Clerical Workers of a Malaysian University Acquire IT Competence?

What is the Existing IT Competence Level of the Malaysian University Clerical Workers?

What are the Conditions for Effective Training in order to Enhance IT Competencies among Malaysian University Clerical Workers and How are the Conditions Ranked?

What is the Relationship between Conditions for Effective Training and IT Competence?

Are there Differences in IT Competence and the Conditions for Effective Training based on the Background of Clerical Workers?

How do the Conditions for Effective Training Affect IT Competence of Clerical Workers of the Malaysian University?

Implications

Model Development Implications

The Development of Instruments for Measuring IT Competence among Clerical Workers

Policy and Practical Implications

Curricular Development Implications

Professional Development Implications

Future Research

Comparative Studies of Factors Affecting IT

Competencies

Use of 'Other Forms' of Analyses

Typology of Clerical Workers through Job Description

Final Remarks

APPENDICES
