Earlier this morning Tan Sri Noorul led the delegation of MOHE UTM MJIT discussing with Toray Industries of Japan at its Head Office. Toray has a long presence in Malaysia. They are already practicing open innovation across businesses - one being with Uniqlo. Toray has expressed interests to what MJIT can offer for a tri-partite collaboration especially in advanced materials. A great opening for a bigger translational research endeavor in Malaysia where the end users needs are the focus. 14/03/17
